QC now

THE BEST WAY TO SECURE INTERNAL QUALITY CONTROL

QC now

THE INTERNAL QUALITY CONTROL SOLUTION FOR YOUR DIATRON PLATFORMS

FEATURES AND BENEFITS

AUTOMATIC OUTLIER DETECTION
see the tests that require your attention

VIOLATION DIALOG FACILITATING COMPLIANCE
to review rule violations and document corrective actions

AUTOMATE QC DATA TRANSFER
utilize real-time access to QC data to improve trouble-shooting and eliminate delays in QC data submission deadlines

AUDIT TRAIL WITH FILTER FUNCTION
for total traceability of user interaction

CUSTOMIZED ANALYSIS DECISION CRITERIA
select the decision criteria to make the analysis of the data point

OPTIMIZED DATA INTERPRETATION
easy-to-read charts and tabular views that support you in data interpretation and decision making

QC REPORT AT ANY TIME
monitor and improve the effectiveness of your QC and review reports online or print them locally for efficient QC management

REMOTE CONNECTIVITY AND "SILENT INSTALL"
provides simple installation without users having to interact

SOLVE QC PROBLEMS EFFICIENTLY

AND CONCENTRATE ON TESTS THAT REALLY REQUIRE YOUR ATTENTION

SAVE TIME
by avoiding false positives

QC now is designed to meet your needs. The QC add-on provides long-term statistical analysis of internal control results coming from the control software of STRATEC/Diatron devices such as the P780 clinical chemistry analyzer or the KleeYa chemiluminescence immunoassay analyzer.

SAVE COST
reduce time delays by providing real time data analysis

HIGH SERVICE QUALITY
full daily statistics at a glance and secure QC records using an external database

SPECIFICATIONS

CHARACTERISTICS

Application	Control result evaluation based on target value range or "intra laboratory" limits
Access rights	Two user groups: Administrator and Operator
Compatibility	KleeYa, P780 Other STRATEC / Diatron devices on request
Control types	Westgard I RiLiBÄK I Accuracy I Precision
QC Trending	Levey-Jennings daily and day-to-day plots I Youden plots
Report formats	PDF I CSV I Hard copy
Report types	
QC Period Report	Displays all information related to the data generated with the QC software
Audit Trail Report	Displays all events leading to the creation, modification and deletion of an electronic record
Event Report	Displays all messages from the system to the user, in particular error messages
Data transfer	Automatic collection of data directly from analyzer main software or manual import via QC software UI
Archive	Remove closed periods from the database and move them to a configurable path
Backup	Create local compressed and stored copies of files and folders
Regulatory	Compliant with RiLiBÄK
